

NASHVILLE City Cemetery

est. 1822

Body, ody, odies!

A Morbid Infographic Focusing on Graves Dated 1846 - 1979

Most Common Causes of Death

As you explore the cemetery, you'll notice the most common listing for cause of death is **unknown**. Upon analysis, 84% of those occurred before the invention of antiseptic in 1867, and 99% occurred before the discovery of Penicillin in 1928. As medicine advanced, unknown causes of death dramatically decreased.
